**Scottsdale Home Remodeling Company, Republic West, Offers New Fiberglass Windows**

Scottsdale, AZ – February 1, 2010 – [Scottsdale home remodeling company](#), Republic West is pleased to offer new fiberglass windows that stand up to extreme environmental conditions.

Homeowners looking for new or replacement windows that can stand up against heat, cold or high winds and offer a savings on their energy bills can now benefit from the new Owens Corning™ InnoVision™ fiberglass windows, available exclusively from Republic West. InnoVision windows feature the first fully bonded frame and sash in the building products industry manufactured without mechanical fasteners. For homeowners, that means permanent, air- and water-tight joints for long term stability and reliable performance.

Linda Zimmerman, co-owner of Republic West said, “These windows deliver the energy efficiency, durability, aesthetics and cost savings that Scottsdale & Arizona homeowners are looking for and the green qualities that we’ve come to expect in Owens Corning™ products, a leader in green building materials.”

She continued, “As a Scottsdale home remodeling company, we only offer great products to our clients – we’re happy to include InnoVision fiberglass windows.”

InnoVision windows come standard with a high performance double-pane insulated glass system, available in three optional glass packages that can be specified for early morning sun, all-day sun or intense heat exposure using a solar reflective Heat Mirror™ film from Southwall Technologies.

Republic West received special directional solar tuning training so they can help buyers choose the right windows and the right glass for their home’s specific exposures, maximizing comfort and energy efficiency all day, every day.

Innovision windows are available in a complete range of styles and a variety of popular solid or split frame colors, and five interior wood grain options to coordinate with different home designs.

When used in residential replacement applications, Innovision windows are eligible for a federal income tax credit of 30 percent of the cost of the windows up to \$5,000, for a possible \$1,500 credit through 2010. And they're backed by a lifetime limited, non-prorated, transferable warranty.
